

AWARDS 2020

27th International Conference on Dental Treatment scheduled during September 7-8, 2020 in London, UK

Andrea del Pilar Escalante Herrera*

Department of Dentistry, Cooperative University of Colombia, Colombia

[Oral hygiene](#) is the repetition of keeping one's mouth fresh and free of disease and other problems (e.g. bad breath) by frequent brushing and cleaning of the teeth. It is primarily that oral cleansing must be done on a daily basis to allow avoidance of dental disease and bad smell. The utmost mutual categories of [dental illness](#) are [tooth decay](#) (cavities, dental caries) and gum diseases, containing gingivitis, and periodontitis.

Dental assistant help make dental treatment more efficient by assisting the dental care provider. They hold and pass instruments, [retract tissues](#) and apply suction to assist better vision of the operating field. They also mix materials, help maintain dental records, and sterilize instruments and equipment. Some also engage in professional teeth whitening procedures, particularly in The Republic of Ireland where laser teeth's whitening is classified as a cosmetic procedure and not dental treatment. This practice usually occurs in clinics solely devoted to laser teeth whitening and not routine dental treatment.

[Dental therapists](#) are licensed dental auxiliaries in some countries. They specialized in caring for children's teeth and oral hygiene. Local dental regulations determine the duties therapists are allowed to perform. Typically, therapists under the prescription of a dentist are licensed to examine children's teeth, administer some forms of local anesthesia, take radiographs, and provide sealants, scaling, and cleaning for children. They also may work in restoring primary teeth and administer vital pulp treatments such as [pulpotomies](#).

Dental technologists are dental professionals who fabricate dental appliances: removable protheses including dentures and orthodontic retainers, and fixed restorative work such as crown and bridges

for the dental operator to insert. [Denturists](#) or clinical dental technicians are dental technicians with postgraduate training who see patients to fabric and fit dentures

Common rules recommend [brushing](#) two times a day: after breakfast and before going to bed, then in an ideal world the mouth would be cleaned after every meal. Cleaning between the teeth is known as interdental cleaning and is essential as tooth brushing. This is for the reason that a toothbrush cannot reach in the middle of the teeth and as a result only removes about 50% of plaque from the exterior of the teeth. There are several tools to clean between the teeth, containing floss and [interdental brushes](#); it is up to respectively single to choose which tool they prefer to use.

On occasion white or straight teeth are connected with oral hygiene. On the other hand, a hygienic mouth can have stained teeth or crooked teeth. To advance the appearance of their teeth, people may use tooth whitening treatments and orthodontics.

The Facts and Facets of Dental Treatment and the most recent research are going to be illustrated by Andrea del Pilar Escalante Herrera, Professor, Faculty of Dentistry, Univeridad Cooperativa de Colombia, USA. in the "27th International Conference on Dental Treatment schedule during July 15-16, 2020 at London, UK. With the help of our esteemed Organizing Committee Members this conference is expected to be one of the most successful and Productive events in the history of ME Conferences.

Join us to witness invaluable scientific discussions and add to the future advancements in the field of [Dentistry and Dental Healthcare](#) in the upcoming "27th International Conference on Dental treatment 2020" which is going to be held during September 7-8, 2020 in London, U.K.

Awards will be offered to the outstanding persons and to the expert researchers who have done exceptional work in the field of [Dentistry](#). The award is considered the most distinguished award in the whole conference and it is termed as Scientific Service Achievement Award. The researchers should have a minimum of 20 years of research experience in the respective field. The anticipatory awardee should be passionate towards their work, willing to innovate and accept the aberrations happening in the research area with the introduction of recent trends. You can nominate anyone you feel deserving to the award.

The award will be presented to professional researchers in the field of [Dentistry](#) with most relevant accomplishments. The award is termed as The Research Contribution Award. The researchers should have a minimum of 10 years of experience in academic or professional research. Part-time research experience would be counted as a pro rata. Doctorate degree is not a must have for this award nominees. They should be hard working, diligent, focused and devoted to the specific field of interest. You can nominate anyone you feel deserving to the award.

The Award strives in providing a strong professional development opportunity for early career academicians-meeting experts in the field, interacting with colleagues from other parts of the world and creating networks and long-term relations.

Young Scientists award is recognition for Masters/PhD/Post Doctorate thesis presentation who will present their projects and thesis that have been implemented to improve long-term excellence in the field of [Dentistry](#). You can nominate deserving to the award.

The award will be presented to the best keynote speaker with a distinguished research work, projects and strategies that will give a new trend in the field of [Dentistry](#). The right keynote speaker adds an

extraordinary feel to the conference. This award perceives advancement in instructing methodologies and strategies just as in conveying keynote presentation in conference and centers on the uniqueness and creativity that expands member's interests.

Best Young researcher will be presented to upcoming researchers and scientists in the field of [Dentistry](#) with a minimum of 10 years of experience. The award is termed as The Upcoming Researcher Award. The researchers with a new and transforming lookup towards research are encouraged. The researchers should bring new technologies and innovations to their work according to the new trends in their field.

The poster presentation with a background provides appropriate perspective/context for the subject. The research design should be appropriate and transparent. Student Poster Competition is organized at Conference, to encourage students and recent graduates to present their original research.
