

9th Internal Medicine Conference scheduled on March 18-19, 2020 at London, UK: Past Conference Report

Sergey Suchkov*

Sechenov University, Russia

The specialists in [Internal medicine](#) apply scientific knowledge and clinical expertise to the diagnosis, treatment, and compassionate care of adults across the spectrum from health to complex illness. Internists are experienced in the management of patients who have [multi-system disease](#) processes. General internists may practice in a variety of settings. Their training uniquely qualifies them to practice [primary care](#) and follow patients over the duration of their adult lives and establish long and rewarding personal relationships with their patients. Internal medicine patients are often seriously diseased or require complex examination; internists do much of their work in hospitals. Internists often have subspecialty interests in a disorder affecting particular organs or organ systems. [Patient care](#) is defined as the management of hospital facilities, assistance, and staff as per the therapeutic and nursing needs of the patient. Internists care for confined and ambulatory patients and may play an extensive aspect in teaching and research.

The main aim of our Internal Medicine 2020 Conference is to explore the latest technologies and to discuss the advancements of the medical industry at London, UK on March 18-19, 2020. The Key topics that will discuss in Internal Medicine Conference are Aesthetic Medicine, Antibiotic Resistance, Clinical Trials, Gastro, Endocrinology, Genomic Medicine, Geriatrics, Hospital Medicine, Microbiome, Migraine, Obesity and Weight Management, Pain Management, Palliative Care, Patient Safety and Rare Diseases.
